

The Alliance Center is a WELL Health-Safety rated building. This guide is one part of a 21 part series highlighting the various features our facility accomplishes to make it a healthier and safer place for our occupants and visitors.

PROMOTE FLU VACCINES

FEATURE OVERVIEW

The Intent of this feature is to **reduce incidence of seasonal influenza (flu) and promote flu vaccinations.**

Unvaccinated individuals pose a risk to public health, and seasonal flu causes severe illness and death in high-risk populations, costing the U.S. \$10.4 billion in annual healthcare costs

HIGHLIGHTS OF WHAT WE'VE DONE

FREE FLU VACCINES FOR ELIGIBLE STAFF

Through insurance and paid time off for vaccinations, all eligible staff members can receive free vaccinations for the seasonal influenza at their convenience.

FLU VACCINATION CAMPAIGN

During flu season, this campaign educates occupants on reasons to get the vaccine, good hand hygiene and cough etiquette, and advises them to stay home when experiencing symptoms.

BENEFITS

Providing opportunities and information for flu vaccinations can increase vaccination rates and reduce flu cases.

Flu vaccinations reduce the quantity and duration of visits to intensive care units, freeing up medical capacity for other needs such as pandemics and natural disasters.
