

The Alliance Center is a WELL Health-Safety rated building. This guide is one part of a 21 part series highlighting the various features our facility accomplishes to make it a healthier and safer place for our occupants and visitors.

PROMOTE A SMOKE FREE ENVIRONMENT

FEATURE OVERVIEW

The intent of this feature is to **deter smoking, minimize occupant exposure to secondhand smoke and reduce smoke pollution through interventions that prevent the use, sale and advertisement of tobacco products.**

Exposure to tobacco smoke can detrimentally affect the health of both smokers and those exposed to it. Ingredients in cigarettes form over 7,000 compounds when burned, of which at least 69 are known to be carcinogenic. Evidence suggests there are serious health consequences associated with exposure to thirdhand tobacco smoke, secondhand marijuana smoke and e-cigarette emissions.

HIGHLIGHTS OF WHAT WE'VE DONE

SMOKE FREE ENVIRONMENT

The Alliance Center is a 100% smoke free environment in the building, as well as, within the vicinity of entrances and air intakes

SIGNAGE AND ENFORCEMENT

This is achieved through signage surrounding the entrances and exits of the building, and enforcement of the policy by building management.

BENEFITS

Promoting a smoke free environment is intended to protect people from secondhand and thirdhand smoke that is detrimental to human health.
